Subject: RE: ERDC Lower Harbor CAD Cell Model

Bob - if comp. sample #3 is from the lower portion of the upper harbor than its probably OK. We've been assuming that all "Superfund" sediments from about the Sawyer St area south would go to the LHCC.

Dave - I just realized that ERDC had composite sample no. 3 going into the LHCC. The original SOW had it going into the UHCC. We are working this issue.

Bob

Subject: ERDC Lower Harbor CAD Cell Model

G'morning Dave!

Attached is the Lower Harbor CAD Cell Model Executive Summary. Also included in the file is the TOC for the report. Other than a few grammatical mistakes, I believe the summary is readable and provides the information that we originally desired.

Please let me know if this meets your short-term needs for information. The current schedule is to have the report drafted by the end of September.

Note: I did not cc Elaine on this email as she indicated she is having "email Inbox capacity problems".

Tx, Bob
